

THE

TANK-18 X 22"

STRUCTURAL FOAM SUMP BASIN

PART NUMBER: M2-2200

With the introduction of the "M" Series Tanks, Topp Industries has created a line of Sewage Ejector and Sump Basins that are setting new standards for all others to follow. Of particular note check our competitors 18"x22" Sump Basin. Is it truly 18"x22"?

The M2 Sump Basin is true to its dimensions and offers an increase of 2.75 gallons over the competition's model. This increased volume translates directly to less cycling time for your pump, increasing pump life while decreasing overall operating costs. Check out all the features that make the new M2 TANK the new industry standard and the only logical choice.

THE STANDARD FEATURES.

- Basin constructed of durable, corrosion-resistant structural foam.
- Increased volume increases performance.
- Choose from Topp's extensive line of steel and plastic covers to suit your exact needs.
- Lightweight, stackable construction. Can be shipped UPS or common carrier.
- A wide variety of Topp inlet options are available.

THE DETAILS.

The 18" diameter x 22" M2 TANK Sump Basin is designed for retrofit and new construction applications. Manufactured with high quality resin and tested to industry standards, the Topp Industries' 18" x 22" M2 TANK Sump Basin is built to last. The specially designed stacking ribs gives the M2 TANK the extra strength needed for extreme long-term reliability and its lightweight, stackable construction is easily shipped UPS or common carrier. Additionally, Topp is widely known for great service. This reputation is based on part on our ability to immediately ship your order from our extensive inventory... You needs are met swiftly and efficiently... Every time. By continuing our tradition of offering more and more unique products at very competitive prices it becomes obvious... Our commitment is to become the single source for your every need.
