

CNC MACHINE PROGRAMMER

Job Description

ABOUT US

A proven leader in sewage, sump and wastewater markets, TOPP Industries, Inc. offers high-quality environmentally responsible products, including fiberglass, polyethylene and structural foam basins, tanks, basin and tank covers, lift stations, septic tank risers, extensions and accessories.

Getting its start out of a 500 square foot garage in Rochester, Indiana, TOPP was started from humble beginnings – and only a few employees. Since that time, TOPP has grown to an internationally recognized brand with over 130 employees and over 300,000 square feet of manufacturing space.

At TOPP, we're invested in your future. We pride ourselves on being an organization that allows all of our employees to grow, develop and truly be a part of the TOPP family. We are also dedicated to supporting our local community and the people that live here. TOPP offers a competitive benefits package for full-time, eligible employees including paid health benefits and life insurance, prescription drug plans, 401K with a company match, paid vacation/holidays and more.

JOB SUMMARY

We are seeking a proficient, competent, and skilled CNC Machine Programmer to join our team at our facility in Rochester, IN. As a CNC Machine Programmer, you will be responsible for utilizing your expertise in CNC Router and CAD/CAM software to program and operate our manufacturing equipment. This is an exciting opportunity to contribute to our production process and ensure the efficient and accurate execution of projects.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Program and setup CNC Router machines using SigmaNEST and OMAX software.
- Create and modify CAD/CAM designs to meet production requirements.
- Read and interpret blueprints, technical drawings, and specifications.
- Collaborate, communicate, and cooperate with the production team to optimize manufacturing processes.
- Ensure quality control by inspecting finished products for accuracy and adherence to specifications.
- Adhere to safety guidelines and maintain a clean and organized work area.
- Learn and understand basic setup and operation of CNC machines.

PHYSICAL REQUIREMENTS

- Light physical effort required
- Regularly required to sit or stand, reach, bend and move about the facility

ENVIRONMENT CONDITIONS

This job operates in a professional office environment. Will need to go out on the production floor from time to time. This role routinely uses standard office equipment such as computers, phones, photocopiers and filing cabinets.

JOB KNOWLEDGE, EDUCATION AND EXPERIENCE

- Proficiency in CNC Router operations and programming.
- Experience with CAD/CAM software, such as SigmaNEST and OMAX Layout.
- Basic computer skills, including familiarity with software applications and data entry.
- Ability to read and interpret blueprints, technical drawings, and specifications.
- Prior experience working in a manufacturing environment.
- Strong attention to detail and accuracy.
- Excellent problem-solving and troubleshooting abilities.
- Effective communication and teamwork skills.
- Must be a self-starter and be able to work at times with limited supervision.

SHOULD BE PROFICIENT IN

- CAD/CAM Software
- Basic Computer Skills
- Blueprint Reading
- Experience in a Manufacturing Environment
