

# Rehabilitation Manhole

Our **Rehabilitation Manhole** provides an efficient solution to the wear and tear of aging manholes. Made of durable, corrosion-resistant fiberglass, our rehabilitation manholes are easily installed into the existing manhole, providing further protection and a long-term solution to degrading manholes. While restructuring a degrading manhole can take extensive time and money, our product provides long term protection for a lasting, affordable solution.

**Part #: RM4200  
RM4800**

## Features Include:

- Constructed of durable, corrosion-resistant fiberglass
- Available in 42" diameter and 48" diameter with custom depths
- Designed for H-20 traffic applications
- Ability to be shipped via common carrier
- Exceeds all industry standards
